SPORT AND PAIN MANAGEMENT MEDICINE

■ **CONDROTROFIN™ ion-serum**

Professional treatment in acute and chronic phases of joint and muscular pathologies. Analgesic, anti-inflammatory, it reduces the edema, increases the functionality of the affected areas.

Specifically designed product for the application with Electromedicine devices: Transdermal Electroporation, Iontophoresis, Depressotherapy- Vacuotherapy, Hydroelectrophoresis, Ultrasound-therapy and Thermotherapy.

Amica Montana, Calendula Officinalis, Aloe Barbadosis, Harpagophytum Procumbens, Vitamina B1, B2, B6, B12, Cobalt, Manganese.

Recommended application:

- 1 to 3 weekly sessions according to process evolution.
- 1 weekly session during 3 or 4 weeks until the process has ended.
- 1 session every 15 days during one month.

■ **CONDRO gel**

The first choice for joint, muscular and sport injuries.

Anti-inflammatory gel, analgesic, it reduces the edema.

Gel for topic application and quick absorption, leaves no stains. Must be applied 2 or 3 times a day over the ached area. Joint and muscular pain reliever. It can be used for sportsmen before sport practise. No limit of application.

■ **CONDRO crema**

The therapeutic massage for rehabilitation processes.

Cream for topic application, indicated for massages. Its direct and immediate action makes it the first choice. It can be used with no limit of application. Due to its creamy texture and packaging, it is mostly indicated for professional application.

Aloe barbadensis, Camphor, Eucalyptus globulus, Turpentine, Mentol, Cinnamomum cassia, Malaleuca leucadendron, Eugenia caryophyllax, Harpagophytum procumbens, Amica montana, Calendula officinalis, Symphytum officinale, Mimosa tenuiflora, Bells perennis.
